A designer with a passion for art and technology, who has a combined experience with in-house and overseas teams, and who is always hungry for knowledge.

Experience

Boba Bot

UX/UI Designer

August 2016

Current

www.bobabot.io

- A slack boba tea delivery bot I developed with a team from Beta version to current implementation and adjustments.
- Improved the efficiency of the app by over 50%.
- Worked in a recent integration with Postmates to automate the delivery process.
- Currently in use by multiple tech companies including Pinterest and Yelp.

OTSAW Digital

UX/UI Designer

January 2016

August 2017

www.otsaw.com

- Assisted the company to develop a start up of five employees to over 25 employees around the world and co-led the design team for both the overseas and in house branches of the company.
- Utilized design skills towards the development of two apps and a robotics division in the company.
- Created the design of the exterior for the surveillance self-driving OR-3 robot. (www.otsaw.com)
- Assisted in obtaining a contract of over 100 units with Dubai private companies and a contract with the Singapore police force.
- Sole designer for the UI interface of the robot control station.
- Led the design for the creation of the web-based interface for the merchant side of Spintable, an app to reserve a table, control orders and process purchase transactions. (www.spintableapp.com)
- Worked from the beginning of the appFIV for the Singapore market that match drivers with users' cars, developing from the idea to the different iterations process, to the launch and updates according to feedback. (www.fiv.sg)
- Was responsible for the design of branding materials, email campaigns online and offline marketing and any other images we used for this purpose.

IXL Learning

SVG Illustrator Consultant

January 2016

to August 2016

- Implemented a smooth transition to web version by re-formatting SVG files and improved the coding of the file to run smoother and properly rendered in a web format.
- Taught the design and engineer teams how to properly set up the SVG files.
